

Dear Atchison Eyecare Family,

Every day, every hour, our country and our community are learning more about COVID-19. Thus far, Atchison Eyecare has closely followed CDC recommendations for sanitation and operations to provide the safest optometric office we can for our staff and patients.

While there has yet to be any confirmed cases in our county or our office, and none of our staff members have exhibited any symptoms, the number of cases in our country does continue to rapidly rise; social distancing is more important than ever. As it always has been, our top priority is the good health and safety of our current and future patients, our staff and their families, and our community. Therefore, we have made the difficult decision to close our doors to the general public and will not be accepting any appointments as of Thursday, March 19, 2020 until Monday, April 13, 2020.

On an adjusted schedule, we will continue to have staff in the office (unless mandated otherwise) to continue to answer phones, schedule future appointments, and do curbside eyewear dispensing. We will also be able to accept contact lens orders that will be directly shipped to you.

We understand this is a difficult time for everyone, and we urge everyone to stay safe and informed during this uncertain time. We wish you all good health and are greatly looking forward to the day this is all behind us.

Sincerely,

Dr. Alison Atchison & the Staff of Atchison Eyecare
